

Amendments to the Specification:

Please replace the paragraph beginning on page 1, line 23, with the following amended paragraph:

An embodiment of the invention will now be described with reference to the accompanying drawing on which FIG. 1. is a schematic view of a first embodiment of the invention whereas FIG. 2 is a schematic view of a second embodiment, and whereas FIG. 3 is a schematic view of a third embodiment.

Please replace the paragraph beginning on page 3, line 14, with the following:

It should in this connection be mentioned that it is possible to save energy and increase the cooling efficiency by using the container 19 as a heat exchanger for the suction pipe 11a. Thus, by enclosing the suction pipe 11a in the container 19, or by bringing these parts together in a heat-transmitting manner 50, as shown in the example embodiment of FIG. 3, heat is transferred from the warm condensate to the cold vapor in the suction pipe 11a. Consequently the cold vapor is heated thereby saving energy at the same time as the warm condensate is cooled which increases the cooling efficiency.
